

The Perfect Fit

The Company

Facts and figures

Partner of the industry

Expertise does not come about overnight, but arises from experience and skills. We have been in the market since 1976 and have made a name for ourselves as partners of the industry. Performance and consistency are what motivate us. Every one of our 400 employees considers it their obligation to find for you not just any solution, but the absolute best solution.

Let's face it – you want first-class material quality, planning certainty and cost-effective purchasing. And that's exactly what we offer. With more than 14,000 tons of pipes, flanges, elbows, buttweld fittings and pipe equipment in our two central warehouses in Stuhr/Bremen and Beucha/Leipzig we have the ideal set-up to do so.

With rhyme and reason: As a competent partner for specific requirements within and across several industrial sectors, we support you in the planning, construction and maintenance of your project. With the delivery service, direct from our warehouses, we can assure you that your material leaves our company securely picked and safely packed. Moreover, our efficient logistics – including our own fleet and contracted carriers – provide a reliable distribution “just-in-time”.

If you would like more information, please call us or browse our Internet pages: rff.de/en
